                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A35522

dnak-type molecular chaperone - Chinese hamster

Natlernate names: heat shock cognate protein 70

C;Species: Cricetulus griseus (Chinese hamster)

C;Species: Cricetulus griseus (Chinese hamster)

C;Species: Cricetulus griseus (Chinese hamster)

C;Date: 09-Nov-1990 #sequence_revision 09-Nov-1990 #text_change 09-Jul-2004

C;Accession: A35922

R;Ahmad, S; Ahuja, R; Venner, T.J.; Gupta, R.S.

Mol. Cell. Biol. 10, 5160-5165, 1990

A;Title: Identification of a protein altered in mutants resistant to microtubule inhibit

A;Reference number: A35922

A;Reference number: A35922

A;Relatus: preliminary

A;Molecule type: mRNA

A;Residues: 1-646 AAIMA

A;Residues: 1-646 AAIMA

A;Cross-references: UNIPROT:P19378; GB:M34561; NID:g191117; PIDN:AAA36991.1; PID:g304516

C;Function:

A;Description: 'involved in protein folding and assembling/disassembling of protein compl

C;Superfamily: heat shock protein 70
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        C;Function:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ò
           Annawity molecular chaperone hsp70A - Caenorhabditis elegans

N.Alternate names: heat shock protein 70 A

C.Species: Caenorhabditis elegans

C.Species: Caenorhabditis elegans

C.Date: 30-Jun-1989 #sequence_revision 30-Jun-1989 #text_change 09-Jul-2004

C.Accession: JT0285

R.Shutch, T.P.; Heschl, M.F.P.; Baillie, D.L.

Gene 64, 241-255, 1988

A;Title: The Caenorhabditis elegans hsp70 gene family: a molecular genetic characterizat

A;Reference number: JT0285; MUID:88297155; PMID:2841196

A;Recession: JT0285

A;Molecule type: DNA, mRNA

A;Residues: 1-640 eSNU>

A;Rote: genomic clones representing six distinct members of the hsp70 gene family were i

A;Note: one of the three introns in hsp70A is in a position similar to an intron in Dros

C;Genetics:

A;Rote: hsp70A

A;Map position: IV

A;Introns: 69/1; 331/3; 558/3

C;Superfamily: heat shock protein 70

C;Superfamily: heat shock; molecular chaperone; stress-induced protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  A;Cross-references: UNIPROT:P08418; GB:L02415; NID:g161025; PIDN:AAA29898.1; PID:g552242

A;Title: Structure of a gene encoding heat-shock protein HSP70 from the unicellular alga A;Reference number: JQ1515; MUID:92175520; PMID:1541398
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  A; Introns. 17/2; 59/3; 106/1; 159/3; 193/2; 550/1

G; Function:
A; Description: involved in protein folding and assembling/disassembling of protein compl
C; Superfamily: heat shock protein 70
C; Keywords: ATP; calmodulin binding; molecular chaperone
F; 205-213 Region: ATP binding #status predicted
F; 222-228 Region: ATP binding #status predicted
F; 221-228 Region: calmodulin binding #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  A;Grobs_references: UNIPROT:P25840; GB:M76725; NID:g167420; PIDN:AAB00730.1; PID:g167421
A;Note: the authors translated the codon GAC for residue 371 as Asn
C;Comment: This protein is inducible by light as well as by elevated temperature.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   RESULT 51
S51682
dnaK-type molecular chaperone hsp70 - Eimeria maxima (fragment)
N;Alternate names: heat shock protein 70
C;Species: Eimeria maxima
C;Species: Eimeria maxima
C;Accession: S51682
R;Dunn, P.P.J.; Billington, K.J.; Bumstead, J.M.; Tomley, F.M. submitted to the RMEL Data Library, December 1994
A;Description: Isolation and sequences of cDNA clones for cytosolic and Reference number: S51682
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             7

N.Alternate names: heat shock protein 70
C.Species: Candida albicans
C.Jate: 07-May-1995 #sequence_revision 01-Sep-1995 #text_change 09-Jul-2004
C.Accession: S51712
